EXPERIENCE

Modular Medical | Senior Software Engineer

January 2022 – November 2025

- Engineered software for the Pivot Insulin Delivery System's embedded firmware and iOS app, with a focus on BLE and NFC communications
- Developed Pivot's threat models and cybersecurity architecture
- Integrated Glooko services into the Pivot iOS app for product telemetry and patient data aggregation
- Built CI/CD systems for software and compliance documentation
- Drove software quality objectives toward FDA 510(k) clearance (K240158)

Dexcom | Senior Software Engineer

December 2018 – January 2022

- Engineered software to support CGM products throughout their lifecycles, from R&D and clinical trials to field failure analysis, notably supporting the commercial launch of the Dexcom G7
- Built BLE communication and data interpretation libraries for CGM devices
- Maintained and expanded CI/CD infrastructure for embedded firmware and internal tooling teams, including automated nightly testing
- Led scrum ceremonies, onboarded junior developers, and participated in technical interviews

Trane | Modeling & Simulation Intern

October 2017 – December 2018

- Developed a web app for engineers, technicians, and management to process HVAC assembly
- Switched the team from SVN to Git and implemented a TFS server for CI

Thomson Reuters | UI/UX Software Developer Intern

June 2017 – August 2017

- Developed components for an internal UI library for use in Thomson Reuters apps
- Implemented aforementioned library components into two new Thomson Reuters apps
- Hosted developer learning sessions relating to Angular practices

Guidance Software | Software Engineering Intern (UI/UX)

May 2016 – August 2016

- Developed the UI for a Tableau forensic imager

EDUCATION

University of Wisconsin-La Crosse | B.S. in Computer Science

September 2014 – December 2018

SKILLS (NON-EXHAUSTIVE)

Protocols:	BLE, NFC, UART, I2C
Languages:	Swift, C#, C, C++, TS/JS, Python, Rust, SQL, Java, Rust, Groovy
Libraries/Frameworks:	SwiftUI, CoreData, CoreBluetooth, Nordic, .NET, EF, WPF, Angular, jQuery
Tools:	Git, GitHub, SonarQube, Docker, Bitbucket Pipelines, Jenkins, SQL Server, Jira, GCP, Azure
